Trelleborg , 1996-11-19

CC-EFFEKT AB hired Peter Engholm autumn 1991 as the company was relatively new. The main task for Peter at this time was to make fire alarm drawings by the help of CAD for two of the largest security companies in Sweden, Securitas and Telalarm.

In the spring of 1992 the company expanded by opening a computer store, Databutiken, in central Trelleborg. Except producing CAD-drawings, Peters tasks were now also to handle the store with all that meant as e.g. assembling and repairing computers, purchasing and selling soft- and hardware, designing forms and brochures with DTP, teaching computer programs such as Windows, DOS, Works, Office; consulting, some programming and finally also handling the financial parts with accounting and budgeting. The company has increased its sales, profit and personnel since Peter joined it, and has him to thank a lot for that.

My view of Peter is that he is creative, ambitious and co-operative. He does not mind hard work or new challenges. He also has an open attitude and a nice manner, which has had a positive significance for the company's contacts with customers. His large knowledge of the PC-world combined with his above mentioned qualities makes me recommend him strongly to any presumptive employer or future education units.

Carl-Axel Carlsson
President CC-Effekt AB
